Feedback for RRMP Literature Review Summative

Tutor completing summative feedback: Karen Outram	Student number: 250393
Details of any extensions etc:	**Submission Attempt:** First submission Second submission

Criteria and weighting	Level	Comments:
Knowledge and understanding of the topic/ issues under consideration (25%)	Very Good	Focusing on the knowledge of the topic; the concept clearly has been well thought through and the knowledge of your topics does feel confident regarding its context. You do have a very good grasp of the topics under consideration relating to your subject matter.
Use of relevant sources (10%)	Very Good	Very good use of relevant resources that are applied both textually and orally in the presentation. These references are thoroughly underpinned by a reference list. It is also clear that research has taken place and so please do continue with this approach moving forward.
Criticality (25%)	Very Good	If you choose to take this study forward for dissertation, then you will have the opportunity to completely focus the study. Currently there is a good holistic sense of what the study could potentially be, either hypothetically or if you do intend to take this forward to another module for example. You do draw through pros and cons of the discussion which is good practice, and there is that connection between theory and real world applicability which is good practice.
Structure and Presentation (10%)	Satisfactory	The presentation and structure is completed to a satisfactory standard. There is a genuine attempt to ensure professionalism regarding how the presentation is laid out and how the text is applied, but it would have been more appropriate to develop the power point using one of the many professional backgrounds that can be used for power to give the content that little bit more interest. Do just also be aware that not a lot of text is needed on slides and that you break up your power point with images.
Presentation and Communication Skills (30%)	Satisfactory	The audio in your presentation is clear but there is quite a lot of background noise, and at one point in the power point there was an automated type of voice delivery that repeated one of the slides you had already discussed. It can be difficult to find quiet spaces and so a good way to mitigate this is to wear headphones.
Overall

Online

Positives:	
	• Very knowledge demonstrated • Very good criticality in evidence • Very good use of relevant resources
Points for development:	
	• Be a little more professionally experimental with your power point presentation slides to get a point of interest • Try to find a quiet space to record or use headphones with a mic • Reflecting on all comments should give you the opportunity to have a more holistic approach to your content overall and this in turn should help develop your grade overall
